May Day, Its Superintendent Announces, Will Do So Nov. 15.

ORE IN OLD JORDAN

THIRTY FEET ENCOUNTERED IN EXPLORATORY WORK.

New Mammoth Cyanides Marketed That Were Worth \$35 a Pound-How the Grand Central-Mammoth Suit Might Have Been Avoided-Survey Made of Black Dragon.

(Special Correspondence.) Robinson, Sept. 16.—J. A. Hunt, superintendent of the May Day, said yes-

several days' round-up at the property of the United States company's mines several days' round-up at the property of the United States company's mines at Bingham. He reports rapid progress as being made on the new three-story, 128x21-foot bunk house, which has been under construction for a week at the Old Jordan, and from present indications it will be ready for the roof in another week. A force of some 125 men are now on the company's pay rolls, and this number will likely be increased by twenty-five in the near future. The mine, Mr. Nelll says, is looking fine, and splendid headway is being made with developments since the instillation of the power drills. Asked whether anything in the way of new strikes had occurred, Mr. Nelll said: "I should like to tell you that at a certain point in the Old Jordan I recently put a diamond drill at work to explore the footwall country and after passing through forty-eight feet of Te-but I won't." Though the new find was described in this jocular manner, Mr. Nell acknowledged that it was a fact, just the same, and he was, of course greatly pleased over the discovery.

CYANIDES WORTH \$35 A POUND.

### CYANIDES WORTH \$35 A POUND. New Mammoth's Product Runs That High.

It was given out yesterday that the initial shipment of gold cyanides from the New Mammoth's mill at Bingham went 325 per pound, and the statement was verified by Manager More at the gold sampling rooms of the Consolidated Kansas City Smelting & Refining company. The initial run was, as previously stated, made on ore which has accumulated on the dump, and as it was all mixed with waste the real capacity of the mill has not yet been determined, but Superintendent J. E. Beveridge is confident that it will handle 160 tons of clean ore every twenty-four hours very nicely. The mine is reported by Superintendent Beveridge to be in an excellent state of development and with the new thirty-horse power electric motor in operation, which he says will be the case early next week he has no doubt of his ability to keep the mill running steadily. In addition to Talsing ore the management intends to keep work going in the tunnel, which is now in a distance of \$250 feet with initial shipment of gold oyanides from List of Those Who Have Gone to to keep work going in the tunnel, which is now in a distance of \$50 feet until the vein is encountered, or 350 feet more. In order to connect with the tunnel the incline shaft on the vein which, by the way, is in ore all the way, will have to be sent down to the way, will have to be sent down to the way, will have to be sent down to the way, will have to be sent down to the way, will have to be sent down to the way. It is a sent to be s which, by the way, is in ore all the way, will have to be sent down to the foot foot level, or something like 146 fest more. When these connections are made all ore will be taken out through the tunnel and delivered at the mill which is located at the tunnel's mouth, without handling. The ledge in the New Mammoth varies in width from three to seven feet, and the walls are as true and well defined as though they had been constructed by a master mechanic. The ores are of a uniform grade and value, and sample from \$7 to \$8 in gold with a little silver, per ton. When the tunnel and shaft are cosmected and the expense of holsting, handling and hauling by team is obviated the New Mammoth ought and undoubtedly will prove to be a splendid paying proposition.

OFFER MADE M'INTYRE.

Samuel McIntyre, Jr., superand of the Mammoth mills, will spend the Sabbath in Salt Lake City.

Messis, C. S. Kimball, C. B. Reams, F. A. Utter and John Self of Salt Lake, were guests this week of the Kirkendall thotel, Rebinson.

J. W. Paxman of Nephrl, who is associated with the big Bullion-Beck store in Eureka, was in Eureka the early part of the week getting acquaintied with the company's new mamager, Arthur H. Ranhof.

The Mammoth public school opened last Monday, showing an enrollment of 200 pupils, a material increase over last year. Professor Work as principal is assisted by Mr. Rigelow, Miss Iverson and Miss Miner.

B. F. Woodward, manuger of the Joe B. F. Woodward, manuger of the Joe City

tack the alternative of going to court and making the fight for upwards of 4,000 tons of ore, which they alege has been extracted by the Mammoth from Grand Central territory.

Has Been Surveyed to Establish

There is no doubt the suit could have een avoided if Mr. Meintyre had been filling to take the offer made him for

## COPPER GULCH MINES.

P. A. H. Franklin Tells of Recent

Developments There. P. A. H. Franklin has returned from his eastern trip. He was very buslly engaged yesterday and spent the greater portion of the day in conference with

### WILL PAY DIVIDEND.

Supt. McIntyre Says Mammoth Will Divide Profits This Month.

Robinson, Sept. 16.—J. A. Hunt, superintendent of the May Day, said yesterday that commencing with the coming week the May Day will be a regular and continuous shipper of marketable open and the first furthermore by November 15 the gaine will commence to post dividends. To those who are reasonably familiar, with the conditions in the property, this statement is readily accepted as a conservative estimate of the mine's possibilities. It will be remembered that ore was first disclosed in the casterly drift run from the breast of the tunnel about 156 feet from the mouth of the big opening, which gives them a vertical depth of something over 400 feet from the surface. A winze was sunk on the ore found at that point named something like 196 feet, and followed north and westerly, and again cast and mortherly, revealing mineral in each driving, the chute, or ore channel pitching east. The belief that has been entertained by many mining men who have examined the May Day ground and those who are familiar with the country contiguous, is that the veln or ore some in the Uncle Sam is the same as that now so clearly defined in the May Day. The ore containing a high percentage of lend, excellent silver values and pay in gold, makes it a gratifying grade of unineral to market.

ORE EVERYWHERE.

Thirty Feet of It Under the Foot Wall In Old Jordan.

Manager James Neill is back from a several days' round-up at the property of the United States commany's miners. Robinson, Sept. 15.-The writer had out the concentrates, presumably, will

tonnage handled may not be so great, but the concentrates, presumably, will be of better values."

When asked about the pending law suit, Mr. McIntyre refused emphatically to say a word in relation thereto, remarking that the case will be tried in court, and not in the newspapers. "Of course we immediately observed the restraining order of the court ordering us to abandon work on the ground in contest, but, fortunately, we have plenty of places to put the men."

When asked if he had any hesitancy in saying where they were obtaining the most of their ore, he said: "Not at all, only it is difficult to say with any accuracy, but I know that we have some fine ore bodies on the 50¢, 50¢, 90¢ and 1,300 levels that are yielding us big volumes and gratifying results, and conditions on the 1,800 level are extremely satisfactory. I am not positive concerning the amount of shipments so far this month to the Sait Lake markets as compared with the same period for August but I can accurate. far this month to the Salt Lake markets as compared with the same period
for August, but I can ascertain from
the books, or you can learn of the station agent, but it is my belief that we
have sent out more. However," said Mr.
McIntyre, good-naturedly, but with
some emphasis, "I am positive that we
will post our regular dividend on Oct.
I and it won't be paid on money that
was left over, as that was all paid out
on the \$80,000 proposition."

## TINTIC VISITORS

Rumore have been afloat for several days that the Grand Central-Mammoth lifigation might be settled out of court. It has been reported that the Grand Central Mammoth life and made Sam Melntyre an offer of il a share-for his stock.

Mr. McIntyre was seen before his departure for Tintic and he denied that any necotiations of the kind were on, but he practically admitted that overtures had been made to him gefore the suit against the Mammoth company was instituted.

It has been learned from reliable sources that Grand Central mammoth Suit and Miss Miner.

B. F. Woodward, manuager of the Joe Bowers Extension mine of Diaviono, spent several days in Salt Lake City last week conferring with the company officials.

In contemplation of a lively fall J. C. Kirkendall of Robinson, is making some improvements and additions to his excellent hitel.

Under the head of arrivals at their respective homes, note is made on the company was instituted. but he practically admitted that overtures had been made to him gefore the
sult against the Mammoth company
was instituted.

If has been learned from reliable
sources that Grand Central capitalists
were willing to give the \$3 a share for
the stock, but Sam's price was just a
half deliar too high for them and they
task the alternative of going to court

Boundary Lines.

J. H. Brown of the firm of Brown.

Terry & Woodruff, returned last evening from a trip to the Black Dragon mine. Tintic, which is owned by the above-named firm. The exact boundary lines of the ground have never been known and Mr. Brown engaged a surveyor who spent several days on the property running lines and establishing the location of corner stakes.

The mine is being prepared for a vigorous campaign of development.

Captain J. R. De Lamar, having completed his investigations here, will leave for New York this morning.

J. E. Beveridge, superintendent of the New Mammoth mine, is in the city. He came down with the initial lot of cyanides.

Franklin Farrell and Robert Grant of the Sioux-Ajax came in from the east yesterday and registered at the Knutsford.

Richard Guenther, jr., has returned from a trip to Bingham, where he has been for several days looking after

shoebridge-Bonanza Work.

Shoebridge-Bonanza Work.

Shoebridge-Bonanza Work.

Special Correspondence.)

Diamond, Sept. 18.—Your correspondence on visited the shoebridge-Bonanza this morning, and was extended the courrespondence that the presence of the premises by Superiment of the water level at a depth of 150 feet. A station is being cut and a continue the extent of the ore bodies.

While the drift is being run, work in the shaft has a feet and the shaft has a continued, the intention being to push it on down to a depth of 500 feet.

The character of the ores on the surrance is a red oxide. At the water level in the shaft had attained a depth of the shaft will be continued, the intention being to push it on down to a depth of 500 feet.

The character of the ores on the surrance is a red oxide. At the water level that are being driven for three drifts that are being driven for they changed to sulphides and Mr. the vein, one from the 200 station from

Franklin says the showing is so good he proposes to push the development work along as rapidly as possible. The Copper Gulch mines are in the west side of the Beaver range of mountains and on the same ledge that can be traced across them through the Skylark, Milan B. and Copper Mountain properties.

The operations of Mr. Franklin are being watched with considerable interest in that section. The ontire district is highly mineralized; the surface croppings are extremely favorable for some big propositions, but the trouble in the past has been that men of sufficient capital have not owned the properties in the camp, hence no deep mining has been done.

There are several good copper properties in the Beaver Lake district, and if some company with plenty of capital back of it should undertake to exploit them there is no doubt the district would become one of the most active mining sections of the state.

WILL PAY DIVIDEND,

yesterday, Colonel J. H. Conrad said that energetic work was still being prosecuted at the mine and about twelve feet a day were being made in the drift on the 566 level.

Asked how the ledge looked on the 366 and whether shipments would commence in the near future, the gentleman said the mine was not yet a shipping proposition; the ledge was badly broken up above, and it would require depth to find it in place. The gentleman said much depended on the work being done on the 600, but it was believed that the vein would be found strong and true on that level.

From Mr. Contrad's statement it is inferred that the vein, so far as prospected on the 309, is badly broken up and that much waste occurs in the ore

pected on the 200, is badly broken up and that much waste occurs in the ore-which is scattered through it. That fact in itself, however, should not, and undoubtedly does not cause any par-ticular uneasiness on Mr. Conrad's part, as it is too well known that per-manency and strength of veins in the district surrounding Park City go to-sether.

## COTTONWOOD INCORPORATION A \$30,000 Company Filed Articles

Yesterday. The Big Cottonwood Mining & Millng company filed articles of incorpora-

ing company filed articles of incorporation with County Clerk Dunbar yesterday. There are 300,000 shares of the
value of 10 cents each.

Properties owned by the company
are the Silver King No. 2, the Louise,
Silver King No. 2 Extension and the
Lu Lu claims. The officers are: President, R. G. Wilson; vice president, J. S.
Johnson; scoretary and treasurer, H.
Barnett: and these, with A. S. Larsen
and Ernest Levin, are the directors.

### THE YOUNG AMERICA.

Hoisting Works and Plant Nearly Ready to Operate.

Advices received from Tuscarors Nev., state that the new hoisting works are almost completed. The new pump are almost completed. The new pump will also soon be installed, and the work of developing the mine on a large scale will be begun. Some very rich bodies of ore have been recently disclosed. The machinery for a new tenstamp mill has been purchased, and the erection of the plant will probably commence soon after the return of Manager Andrew from the east.

## Deal For Dyer Mine. '

(Special Correspondence.) Vernal, Sept. 14.—There has been a persistent rumor around town for the persistent rumor around town for the last ten days that a deal of some kind is on with the Dyer people in connection with the mine and smelters. The truth of the report could not be verified at present. There are different stories afloat as to the amount involved in the deal, but all are agreed on one point, that if a deal is on the figures will be immense, as the mine never looked better than today, and the present owners have a very high opinion of the property. Superintendent Rock Pope, when seen regarding the rumored sale, had nothing to say for publication, further than the future of the mine is bright. Mr. Pope leaves for the Douglas mountain country in a few days, to look over mining matters in lays, to look over mining matters in

that section.

Quite a little flurry of excitement was caused at Carbonate last Tuesday by the disappearance of Willis Murray, who left the evening before to be gone only for a short time, and leaving several head of horses corraied that he expected to attend to on his return.

Murray did not return that hight nor the next day and in the attender.

autray and not return that high nor the next day, and in the afternoon searching parties were sent out, fear-ing that some accident had befallen the missing man. He was finally located at Dave Bennett's camp at the foot of Grizzly mountain, where he had been taken suddenly ill the evening previous.

Burton, H. C. Evans, Salt Lake.

Mr. and Mrs. Horace Eldridge are visiting relatives in the city.

Mrs. D. O. Miner and children returned last week from Nephi.

Grand Central and Mammoth Recover Recent Losses.

BEARS ATTACK PETRO

STOCK REACHED BOTTOM AND TURNED UPWARD.

Daly-West Remained In Good Condition-Sales On Salt Lake Exchange Amounted to \$97,409 During the Week - Utah Exchange Sales Light-Quotations.

The past week closed with the mining stock market in better condition than it was at the opening of Monday's call. Mammoth and Grand Central, which received such a setback at the time the pending litigation came up a week ago, have both regained some of the losses. Mammoth is especially strong and closed only about 10 cents a lower than the highest point just prior to the starting of the suit. It is generally believed that the mine will pay a dividend this month. There was little change in other Tintic stocks. Swansea kept up at strong figures.

Of the Mercur stocks Northern Light was the most active and was plentiful. Holders were anxious to drop it and prices ran frightfully low. There have been rumors afloat that the mill would likely shut down and that probably had something to do with the slump. Officers of the company, however, deny that any such steps will be taken. Mercur was strong during the week. Chloride Point keeps at a low point, notwithstanding the mine is in better condition than it ever was. A concerted raid was made upon Petro, one of the gilt-edged propositions of Bingham. The stock was hammered down to about 70 cents a share. There has been apparently no good reason for it, as the mine is paying dividends regularly and is in better condition physically and financially than it ever was. It is said a great many "shorted" on the stock. The tide turned yesterday and during this week some very sharp advances are looked for and some say a few brokers who sold short will be called upon to pay for their manipulations. Of course this its all conjecture.

Daly-West was strong and inclined towards the advance.

The following sales were made on the Salt Lake exchange during the week:

No. Shares. Amount.

Monday 25:100. \$6.59
Thursday \$2.400. \$1.550

The Utah exchange did a light busi-ess during the week.

Yesterday's Transactions.

Mammoth was in big demand during yesterday's call on the Salt Lake exchange. The stock opened at \$2.08 and closed at \$2.10. Petro was also an active stock. It started in as low as 65 cents and gradually rose up to 714 before the caller's hammer dropped. Valeo was called out at 67% and Bunker Hill dropped at 7 cents. Midnight er Hill dropped at 7 cents. Midnigh Bowers remained at stationary figures sold all the way from F4 up to 6 cents

a share.
The Utah exchange did not hold a Saturday session.

## MR. WEST REPLIES.

Sees No Reason Why His Partnership Should Cease.

Should Cease.

When Charles E. Hodson, secretary of the Sait Lake Stock & Mining Exchange, opens his mail today he will find a letter from Broker 22. M. West, who was notified a few days ago that his partnership with A. L. Morris is in violation of the rules of the exchange. Mr. West takes the ground that the document sent him is an extraordinary one, and expresses the opinion that is is at variance with the intention of the constitution of the United States relative to citizenship. Mr. West claims that he was associated in business with Mr. Morris before he acquired a membership on the exchange; that the members of the exchange were aware of it at the time; that the constitution and hy-laws of the exchange at that time made no provision for the future, therefore, he sees no reason why his parimership with Mr. Morris should not continue to exist. He also states in his communication that the action of the governing Soard has not been made apparent to him, and does not, in his opinion, meet any well defined demand and he asks for more definite information why the attack is made upon him.

Christmas Money. Stocks bought now will make you Christmas money. See Cole & Higgina, room 412 D. F. Walker building, Salt Lake City. 'Phone 339.

Christopher Hilberg, who was con-victed of criminal intercourse with Annie Ward, a girl under the age of consent, will not be sentenced until Tuesday.

His attorneys, Harrington & Snow, filed a motion for a new trial yesterday and Judge Norrell thought it better to postpone the passage of sentence un-til the motion could be argued. The ground for a retrial is errors in the first trial. first trial

Sick Headaches,

the curse of overworked womankind, are quickly and surely cursed by Karja Clever Root Tea, the great blood purifier and tissue builder. Money refunded if not satisfactory. Price, 25 cts. and 50 cts. For sale at Z. C. M. I. Drug Rept.

# FALL NEEDS FOR MEN.

Most important just now is the Heavy Underwear. Are you ready for it? We're ready for you, and a better stock we never had to show you. Better stock means more

kinds and better values. Can only give you a hint here of the many kinds. Start them at \$1.00 the suit for fleece-lined goods or a wool plush; then at \$1.50 for a nice wool kind, and \$2.00 for natural gray and brown wool; \$2.50 and \$3.00 for all-wool, brown, ribbed goods; \$4.00 for a very fine quality of wool, shirts with doeble breast shield, and drawers with double seat; \$5.00 for a fine gray cashmere, and \$8.00 for our finest glovefitting woolen goods.

## SOME NEW TOP COATS.

Just to hand are a lot of Covert Cloth Top Coats, coats that ought to bring \$20.00, measured by Gardner standard of values. They are made up in very latest style. We've marked them for quick selling, \$15.00.

Other fall needs-Hats and Shirts.
